

## FEATURES

- Detection of all types of hidden video cameras not depending on their working state
- Distance of detection between 2 and 10 meters
- IR filter for rejection of natural reflections
- Adjustable power of radiation
- Powered by 2 AAA batteries
- Battery discharge indicator
- Size 140x34x16 mm

This unique device was created for professionals in the sphere of surveillance countermeasures. Thanks to its optical principle the "WEGA-i" can discover lenses of all types of covert cameras not depending on their working state.

The WEGA's LED matrix radiates a powerful infrared beam which is then reflected by a video camera's optics and is easily detected by the operator.

The IR-filtering glass built into the "WEGA-i" helps the operator to avoid natural reflections from surfaces and concentrate on finding the exact location of a hidden camera.

## SUPPLIED SET

Detector, 2 AAA (LR03) batteries, user manual

## EXAMPLES OF DETECTION

■ Body-carried video camera in a tie

■ Video camera in a wall

■ Video camera in a copying machine

## EXAMPLES OF VIDEO CAMERAS which can be found by WEGA-i:
